

Improper Input Validation in OWASP JUICE SHOP

go to the deluxe membership section

Go to the inspect tab and change the button from mat-button-disabled to mat-button-enabled to enable the pay button

Intercept the request and click on the pay button,

The screenshot shows the Burp Suite interface with the 'Intercept' tab selected. The request is a POST to `http://localhost.com:3000/rest/deluxe-membership`. The request body is in JSON format:

```
{  "paymentMode": "wallet",  "paymentId": 7}
```

The Inspector panel on the right shows the following details:

- Request attributes: 2
- Request query parameters: 0
- Request cookies: 5
- Request headers: 12

In the paymentMode change from “wallet” to “ ” and forward the request.

Vulnerability exploited!

You successfully solved a challenge: Deluxe Fraud (Obtain a Deluxe Membership without paying for it.)
